DETAILED ACTION

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. **Claims 1, 7-12**, drawn to a method, and apparatus for communication over wireless communication network, classified in class 370, subclass 328.
 - II. **Claims 2-6**, drawn to an apparatus for a line concentrator, classified in class 379 subclasses 333, 334.
3. The inventions are distinct, each from the other because of the following reasons:
4. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I, and II, has separate utility such as communication over wireless network (I), and aggregation of multiple lines into a single line (II). See MPEP § 806.05(d).
5. The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found

allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

6. Because these inventions are distinct for the reasons given above and the search required for each Group I, and Group II are in different areas, restriction for examination purposes as indicated is proper.
7. A telephone call was made to Surinder Sacher, to request an oral election to the above restriction requirement, but did not result in an election being made.
8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
